**Maxeon to Supply Approximately 400MWdc of its Performance Line Solar Panels to Origis Energy**

On March 17, 2022, Maxeon Solar Technologies, Ltd. (the “Company”) issued a press release announcing that the Company will supply high-efficiency bifacial solar panels to Origis Energy Ltd (“Origis”) for use in utility-scale projects in the United States. A copy of the press release is filed herewith as Exhibit 99.1.

In line with the Company’s efforts to expand sales of its Performance line solar panels to US utility-scale customers, on March 14, 2022, Maxeon Americas, Inc., a subsidiary of the Company (“Maxeon”) entered into a Solar Module Supply Agreement (the “Supply Agreement”) with a wholly-owned subsidiary of Origis. Under the Supply Agreement, Maxeon has agreed to sell approximately 400MWdc of its Performance line solar panels for use in Origis’ utility-scale projects located in the United States. Deliveries are scheduled to begin in June 2023, with the final solar panel deliveries scheduled for December 2023. Under the Supply Agreement, Origis has agreed to make an advance payment equal to approximately thirty percent of the total Supply Agreement price. Half of the advance payment will be made in March 2022 and the other half will be paid in December 2022.

The Supply Agreement contains certain technical terms and conditions, such as setting out detailed quality, testing, and performance specifications. In the event the Company is unable to deliver conforming solar panels pursuant to the required delivery schedule, the Company is required to pay damages for such delivery delays subject to an agreed upon cap. In the event that delay damage liability reaches the cap, Origis may terminate the Supply Agreement for cause. All solar panels will be covered by a 12-year product warranty, and a 30-year power warranty. The Supply Agreement also contains a termination for convenience provision whereby Origis may terminate the Supply Agreement early (in whole or in part), provided Origis pays certain liquidated damages to the Company. The Supply Agreement also contains provisions customary within the solar industry such as limitation of liability, termination for cause, force majeure, change in law, a tariff-sharing arrangement, compliance with applicable environmental, social and governance laws, and credit support requirements.

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

## Origis Energy, Maxeon Solar Technologies Announce 400MW Module Supply Agreement

### *Maxeon to supply bifacial Performance line modules for U.S. projects*

**SINGAPORE, 17 March, 2022** – Maxeon Solar Technologies, Ltd. (NASDAQ: MAXN), a global leader in solar innovation and channels, today announced that it will supply approximately 400 megawatts (MW) of its high efficiency shingled bifacial Performance line solar modules to one of America’s top ten solar and energy storage developers, Origis Energy, for use in Origis’ U.S. utility-scale projects. Module deliveries will commence in June of 2023 and will conclude at the end of 2023.

“This 400 MW procurement agreement with Maxeon Solar Technologies is an important component to fulfill the robust Origis solar portfolio. The Maxeon technology will help ensure our solar plants meet performance goals to provide clean, competitively priced energy to our customers across the U.S.,” said Guy Vanderhaegen, Chief Executive Officer & President, Origis Energy. “Additionally, Maxeon continues to be a pioneer in sustainability initiatives including its leadership with Environment, Sustainability and Governance (ESG). ESG factors are important to all Origis stakeholders, from investment partners to utilities and corporate energy buyers. We look forward to a productive alliance with the Maxeon team.”

Produced using sophisticated, proprietary manufacturing processes, the Performance line solar modules leverage Maxeon’s shingled cell technology, protected by 83 granted patents. Utilizing bifacial mono-PERC solar cells made on large format eight-inch G12 wafers, the Performance line offers industry-leading efficiency along with enhanced shade tolerance and unparalleled durability to reduce system lifetime energy cost.

“We are pleased to be selected by Origis Energy as a long-term partner,” said Jeff Waters, CEO at Maxeon Solar Technologies. “Origis’ decision to invest in our Performance line validates the technology’s performance, durability and reliability advantage over conventional solar panels, as well as its competitiveness. Moreover, it proves the confidence utility-scale customers have in our ability to deliver on our commitments.”

#### **About Maxeon Solar Technologies**

Maxeon Solar Technologies (NASDAQ:MAXN) is Powering Positive Change™. Headquartered in Singapore, Maxeon designs, and manufactures Maxeon® and SunPower® brand solar panels, and has sales operations in more than 100 countries, operating under the SunPower brand in certain countries outside the United States. The Company is a leader in solar innovation with access to over 1,000 patents and two best-in-class solar panel product lines. Maxeon products span the global rooftop and solar power plant markets through a network of more than 1,400 trusted partners and distributors. A pioneer in sustainable solar manufacturing, Maxeon leverages a 35-year history in the solar industry and numerous awards for its technology. For more information about how Maxeon is Powering Positive Change™ visit us at [www.maxeon.com](http://www.maxeon.com), on LinkedIn and on Twitter @maxeonsolar.

#### **About Origis Energy**

Origis Energy is bringing clean and cost effective solar and energy storage solutions within reach for utility, commercial and industrial as well as public sector clients. The Origis team has worked to ensure the interests of all stakeholders are upheld in 170 projects worldwide totaling more than 4 GW to date of developed solar and energy storage capacity. Headquartered in Miami, FL, Origis Energy delivers excellence in solar and energy storage development, financing, engineering, procurement and construction (EPC) and operations, maintenance and asset management for investors and clean energy consumers in the US.
